
GroomerII

Pre-Paid Solutions

LYCATEL, a UK-based prepaid calling card provider, needed a solution to enable incoming ISDN calls to be routed to multiple, independent SIP applications.

GroomerII

Pre-paid solutions

The results

Using Aculab's GroomerII gateway, LYCATEL was able to:

- Successfully launch its updated prepaid solutions offering
- Cost-effectively deliver call services to its expanding customer base
- Maximise return on investment from its IP-based, SIP-centric services delivery platform
- Benefit from Aculab's willingness and fleetness of foot in implementing a critical change

The solution

Aculab's development team implemented additional functionality in GroomerII to enable unique routing configurations to be applied, using wildcard parameters in the translation of DDI numbers to IP addresses. As a result, all calls are routed to the correct, SIP-based platform, based on a unique DDI number range being allocated to each individual application.

About Aculab

Aculab is an innovative company that offers deployment proven technology for any telecoms related application. Its enabling technology serves the evolving needs of automated and interactive systems, whether on-premise, data centre hosted, or cloud-based.

Over 1000 customers in more than 80 countries worldwide, including developers, integrators, and solutions and service providers, have adopted Aculab's technology for a wide variety of business critical services and solutions.

Aculab offers development APIs for voice, data, fax and SMS, on hardware, software and cloud-based platforms, giving a choice between capital investment and cost-effective, 'pay as you go' alternatives.
